SALES TAX – Applies to Minnesota Residents Only

We are required to collect 7.25% sales tax on materials from MN residents.

The cost in producing Interior and Top kits averages 50% materials and 50% labor. Since materials are taxed and labor is not, sales tax will be applied to 50% of our kit cost. For example, if a kit costs \$500, then \$250 of that is materials, so the tax on this kit would be: $\$250 * 7.25\% = \18.12

Products we do not produce are taxed at 7.25% of their full cost. For example, seat springs and door handles fall into this category.
